INTRODUCTION

A Vocabulary Companion to Practical English 1 is a compilation of vocabulary exercises pertaining to topics covered in the Practical English course at the MA level. It has been written to provide University of Lodz students at the Faculty of English Philology with the extra practice they need to enrich their knowledge of the English vocabulary practised in the classroom.

The exercises in higher-level vocabulary are built around the following five topics: *Prejudice and Discrimination*, *The Culture of the Image*, *Marketing*, *Work and Success*, and *Demography*. They include collocations, idiomatic expressions, prepositional phrases, word formation, and phrasal verbs.

This book has been written mainly as an in-class workbook but can also be used as a self-study handbook. Hopefully, students will find it a handy resource for further practice.
